

Why is an iPad mandated?

An iPad is mandated to provide a unified platform for directed learning in the classroom. While digital technologies provide powerful teaching aides, they are also an equally powerful source of distraction.

By using iPads, we can fully leverage the power of the digital classroom by returning control to the teacher, providing a platform for truly directed learning. This is possible because of the level of control teachers will have over the student iPads through services such as Apple Classroom and our MDM system.

See 'what does DEP enrolment mean' for more details.
